

NORTHEAST REGION HEALTH CARE COALITION

NERHCC Recovery Programming – Coalition Expertise

Dates/Location:

May 11th Lincoln County Fairgrounds

May 12th Logan County Courthouse

The Do Tank thrusts attendees into the whirlwind of the immediate post-disaster setting. It is within the cacophony that innovation is used to shape recovery and design solutions to continue care-solutions that best meet the needs of the Northeast Region Healthcare Coalition (NERHCC). Trained facilitators will guide participants through a 3-part design process to build out specific areas and provide insight for the NERHCC Recovery Framework within the Response Plan.

NERHCC DO-Tank Recovery Plan Workshop

Objective

By building solutions together for the NERHCC Recovery Framework, Do Tank participants will arrive at innovative and novel outcomes, achieve team integration, perform a deep dive into how design thinking applies to the NERHCC Recovery Framework within the Response Plan. Additionally, the workshops will provide direct input, insight, and guidance from NERHCC coalition members towards the NERHCC Recovery Framework.

Participants benefit from utilizing our design process to:

- Participate in the NERHCC Recovery Framework buildout.
- Learn a design-thinking methodology to use for future challenges.
- Continue to showcase the innovation occurring at NERHCC.

List of expertise requested. Please note, that the Do Tanks are not limited to these specific areas, and we welcome all expertise to support the recovery build out:

- Hospital Leadership and Practitioners
- Crisis Counseling
- Emergency Management
- Emergency Medical Services
- Long Term Care
- Behavioral Health
- Epidemiologist
- Public Health
- Emergency Preparedness and Response Staff
- Other

FACILITATORS

(Desi) Matel-Anderson has worked with communities from the Appalachia region to New York City and from a regional Nebraska Healthcare Coalition to the Pacific Northwest. Armed with a team of design-thinkers, Desi empowers survivors to think beyond their current predicament and disrupt the status-quo to build resilience. Desi also runs “do-tanks” around the world, where participants “solve” for future disasters, including earthquakes, floods, tornadoes, and windstorms. Desi shares her learnings as an expert lecturer on innovation at Harvard, Yale, and Berkeley, to name a few. She is an Advisor to the European Emergency Management Consortium and was appointed to the United States National Academy of Science, Engineering and Medicine. Desi was also the first (and now former) Chief Innovation Advisor at FEMA.

Dr. Pattijean Hooper

An innovative thinker, Dr. Pattijean Hooper brings 25 years’ experience to the field of emergency management emphasizing whole community inclusion in all aspects of the field from policy, planning, field operations, training & exercises, and performance measures. She served on the Washington State Emergency Management Advisory Group and the Washington State Emergency Management Council. As a local emergency manager, Pattijean was the architect for Washington State’s first [Accessible Community Emergency Response Team](#) (CERT) training for people with disabilities taught fully in American Sign Language (ASL). Employed by FEMA for 14 years; she has worked with federal, tribal, state, local, and community-based organizations. As a subject matter expert in emergency management Pattijean has lead a contract team for the federal effort to supplement and enhance the Medical Countermeasures plan for New York City, working closely with the NYC Department of Health and Mental Hygiene.
